Anesthesia/Surgery Consent Form

Pet Name: _____

Client Name:
Phone Number:
Email Address:

Your pet will be undergoing general anesthesia plus a surgical procedure today. In order to recognize any underlying abnormalities your pet may have, we have already performed a complete blood profile.

We require placement of an IV catheter to administer fluids while under anesthesia. IV fluids will aid the body in stabilizing internal organs, stabilizing blood pressure, and flushing the anesthesia out of the body more efficiently. Along with shaving the hair at the IV catheter site, we may also shave other areas including the surgical site for surgical prepping and cleansing, and also the monitor sites, so they will function properly.

I understand that some risks always exist with anesthetic procedures, and that I am encouraged to discuss any concerns I have about those risks with the attending veterinarian before these procedures are initiated. Should some unexpected life-saving emergency care be required and the attending veterinarian be unable to reach me, the staff has my permission to provide such treatment, and I agree to pay for such care.

I agree to indemnify and hold Cascade Summit Animal Hospital harmless from and against any and all liability arising out of the performance of any of the procedures referred to above.

What phone number(s) can you be reached at today: _____

Are there any times you will be unavailable? _____

Can you be reached by text if we can't reach you by phone? Yes No

Number to text: _____

Signature: _____

Your Initials Here Will Serve As Your Digital Signature:

Date: _____

What to expect on your pet's procedure day!

Admit time

We admit all of our surgery patients in the morning before our procedures get started. First thing in the morning the doctor examines all of the surgery patients and plans the anesthesia protocol for each pet. We generally have 3 procedures. Your pet may be the 2nd or 3rd procedure of the day, which means they will be resting comfortably in our treatment room before they get started. From pre-medication to final recovery, each patient may need 2-3 hours of attention. Some procedures take longer than expected. Your pet may be started in the afternoon.

Discharge Appointment

After your pet's procedure is finished, we will call you to let you know they are awake, and we will discuss a time to pick them up. The pick-up time is generally at the end of the day to ensure they are fully recovered from the anesthesia. Please plan on approximately 15 minutes to review medications and post-anesthesia instructions.
